

GSCCC Stakeholder Meeting Highlights
December 6, 2013

Twenty-seven attended the meeting, which was held at DES Offices, Concord.

Doug Fraser of Dartmouth's Thayer School of Engineering presented on the school's annual Formula Hybrid competition. Students from around the world competed in design, marketing and budget, performance and efficiency. The presentation outlined Thayer School of Engineering's process for identifying creative engineers-of-the-future, with many photos of student creations. Large auto makers sponsor the event and attend to recruit talent.

Rob Lyndes of Tri-State Trucking presented on winter care of medium and heavy duty vehicles. He elaborated on the common "ailments" of vehicles brought in to the shop in Shrewsbury and emphasized the value of maintenance (and a good preventative maintenance technician). Several attendees discussed issues they'd had with their vehicles in the winter.

Dolores Rebolledo, GSCCC coordinator provided updates on the recent CNG cylinder inspection and gaseous fuels first responder classes that GSCCC held, along with the National Plug-In Day celebration and recent changes to the Granite State Clean Cars program. Joe Alosa of Patsy's Bus Sales announced the upcoming grand opening of Patsy's propane fueling station; all are invited. The meeting adjourned at 11:20.
